WELCOME
TO A WORLD
OF WELLNESS,
RELAXATION,
AND BEAUTY

Standard elements
and building materials
for custom saunas

STS4 thermo-aspen, private house in Estonia
Photo by Elvo Jakobson

Thermory has been producing quality wood products for over 25 years, and we offer a complete range of high-quality materials, ready-made elements, and accessories for sauna design. Whether you're looking for a complete sauna that's ready to install or individualized components to custombuild your own dream design, we'll help you create a sauna space that looks great and leaves you feeling energized and refreshed.

Our broad range of wood species, profiles, and dimensions caters for a variety of styles, offering everything from standard sauna materials to distinctive products with novel designs that allow those with a bolder outlook to create a wellness space that combines convenience and practicality with striking visual features.

With a choice of natural, thermally modified, brushed, and painted wood finishes, our unrivaled range of options will ensure that you can design a sauna experience that's just right for you. And if you're looking for a quick and easy solution, we also offer a wide range of ready-made elements, from wall panels and bench boards to doors and accessories.

1. We are Thermory®

Thermory is the world's largest manufacturer of chemical-free thermally modified timber and sauna materials. Over 90% of our sales are exported to more than 50 countries.

We're dedicated to offering real wood solutions that exceed expectations and enhance environments, and our product portfolio includes decking, cladding, and floorboards made from thermally modified timber and coated wood products for interior and exterior use.

We are also a major player in the sauna, spa, and wellness sector; as the world's leading manufacturer of sauna materials and ready-made saunas, Thermory saunas can be found in homes and public spaces worldwide.

100% REAL WOOD PRODUCTS

QUALITY MATERIALS

An unbeatable range of wood species, profiles and finishes

INDUSTRY EXPERTS

Delivering superior quality and unrivaled beauty for over 20 years

SUSTAINABLE

Wood from sustainably managed forests with chemical-free modification

2. Thermal modification

Thermally modified timber is our key strength at Thermory. With our exclusive, state-of-the-art technology and years of expertise, we know exactly how to bring out the best in wood.

Thermally modified wood is natural – its properties are enhanced using just heat and steam. This chemical-free process results in an environmentally friendly and aesthetically pleasing material that’s significantly more durable and stable than conventional timber.

As well as offering these practical benefits, our thermal modification treatment also creates dynamic visual effects, with the wood taking on an appealing darker brown shade. The intensity of the color depends on the wood type and the duration and temperature of the modification process. The highest temperature of medium thermal modification is 190 °C and intense

modification 210 °C. This gives you the opportunity to choose between lighter and darker materials to suit your desired color palette.

Thermally modified timber is suitable for interior and exterior use in both homes and public spaces.

Thermal kilns at Loo production unit.

Our thermally modified wood for sauna design undergoes a process that uses a precise combination of heat and steam.

This process is completely natural.

THE HEAT

ENHANCES THE WOOD’S STRUCTURE THROUGHOUT

THE STEAM

GIVES US FULL CONTROL OVER THE PROCESS

THERMALLY MODIFIED WOOD
Naturally enhanced using only heat & steam

DIMENSIONAL STABILITY
Enhanced dimensional stability in changing weather conditions

CHEMICAL-FREE
Thermal modification process is entirely natural

DURABILITY
Improved durability and rot resistance

BETTER INSULATING QUALITIES
Reduced thermal conductivity

NON-HAZARDOUS WASTE
Safe waste handling

3. Wood treatments and finishes

As well as thermal modification, we also offer other treatments for your unique

wellness space with brushed, painted, and patterned finishes to choose from.

BRUSHING

Brushing emphasizes the natural texture of the wood, giving the panels an elegant look that's normally associated with aged wood. This attractive patterned surface can be further highlighted on cladding and interior walls with creative lighting design.

PAINTING

Thermory offers painted boards and panels, which are ideal for the sauna. The standard colors are white, gray, and black and you can also try other colors to engage your creative side – just ensure that they're suitable for use in the sauna.

EMBOSSING

Embossing is our novelty technique that gives a beautiful distinctive pattern to the wood.

4. Wood types for the sauna

Every sauna design is different – some prioritize practical aspects that will deliver a superior bathing experience, while others focus more on decorative elements and visual appeal. Whatever features you

choose for your sauna, there are certain universal principles, like using woods that don't overheat or secrete resin for the benches and selecting interior materials that are resistant to heat and moisture.

EUROPEAN ASPEN

Aspen is a deciduous tree of the willow family, in the Malpighiales order. It grows across Europe and in most of Asia, as well as northern Africa. Aspen makes an ideal sauna material because it doesn't secrete resin, create splinters, or get too hot. Its characteristic light tone and smooth texture give it an attractive look and make it perfect for painting. We offer a number of interior sauna elements in both natural and thermally modified aspen.

NATURAL

MEDIUM THERMO

EUROPEAN BLACK ALDER

Alder, also known as black alder, is a perennial deciduous tree in the birch family of the Fagales order. It can be found in most of Europe, southwestern Asia, and northern Africa. Thanks to its reddish tone and pleasant texture, alder wood is popular as a finishing material in saunas. Alder is hardy and water-repellent, and it doesn't overheat. We use alder to produce a variety of interior sauna materials and products, with thermally modified and brushed finishes available

NATURAL

MEDIUM THERMO

INTENSE THERMO

RADIATA PINE

The radiata pine is a coniferous tree of the pine family, in the Pinales order. It can be seen growing in western North America, New Zealand, Australia, South Africa, Chile, and parts of Europe. Radiata pine's rapid growth and excellent quality make it among the most cultivated coniferous species. With no exposed knots, the wood doesn't secrete resin, splinter, or overheat, making it great for sauna benches. Wide boards, brushing to bring out the natural pattern, and the darker hue from thermal modification offer an additional touch of luxury.

INTENSE
THERMO

MAGNOLIA

Magnolia, also known as the tulip tree, belongs to the magnolia family in the Magnoliales order. It grows mainly in central and eastern parts of North America. Magnolia has a creamy, golden hue with darker areas, and a characteristic pattern with similarities to ash and radiata pine. Along with its low density, this makes it perfect for the sauna. Wide boards and the dark shade achieved by thermal modification offer a luxurious, exclusive finish.

MEDIUM
THERMO

WESTERN RED CEDAR

Western red cedar is an evergreen coniferous tree in the cypress family of the Pinales order that grows in the western part of North America. The western red cedar, also known as Pacific red cedar, is perfect for saunas because it doesn't secrete resin or overheat, and it is also water repellent. Red cedar is known for its pleasantly rich aroma and its exquisite reddish color with a range of natural shades.

NATURAL

NORDIC SPRUCE

Spruce, or European spruce, is an evergreen coniferous tree of the pine family in the Pinales order. It grows in northern, central, and eastern Europe. The wood of the Norway spruce is almost white, with a light yellowish undertone – it is one of the lightest coniferous woods. Spruce is often used as timber, and for saunas it is generally preferred for outer walls. We can also brush the wood to further enhance its attractive natural pattern.

5. Sauna materials

We have everything to create DIY sauna – a wide choice of wood species with various treatment options and a broad selection of profiles and panel sizes from

smart and narrow to luxuriously wide. All of this adds up to endless combinations to make sure that your sauna is uniquely designed for you.

Leave a lasting impact

THERMORY is a world leader in the thermal modification of wood. We offer high-quality, long-lasting solutions that benefit from environmentally friendly technology. We have spent the past two decades developing our expertise through close collaboration with architects, designers, builders and homeowners – constantly revising our product selection and refining our technology in the process.

THERMORY promotes a transparent and responsible corporate culture. We care about the environment and treat nature with deep respect. Our purchasing process is environmentally responsible, and we exercise high standards for quality and sustainability. Our timber is carefully inspected and harvested from sustainably

- DECKING
- CLADDING
- INTERIOR
- SAUNA

managed forests. If desired, we can offer PEFC, FSC or Nordic Swan Ecolabel-certified wood.

As a renewable resource that is both durable and an excellent insulator, wood is one of the most environmentally friendly choices for your construction projects. If you think it's important to protect our valuable resources long into the future, then we're on the same mission. We create lasting value, because we want to leave behind a more harmonious and sustainable world.

REAL WOOD PRODUCTS WITH BEAUTY AND STABILITY IN EVERY FIBER
